

# Resell DSL

# Welcome to Openserve

For years, Openserve has underpinned telecommunications in South Africa.

In recognition of the dramatically changing communications landscape here and around the world, we have recently invested heavily at all levels of our next-generation network.

This is with an eye on building the foundation of an open, vibrant and innovative communications eco-system.

We invite you to take this opportunity to astound your customers with truly innovative products and services that help them work better and communicate easier.

# Resell DSL

Resell DSL is still the primary method most people use to access internet in South Africa. More choice over DSL access speeds is key to bringing connectivity to as many people as possible to create a truly connected, digital nation.

We have introduced two new Resell DSL access speeds for our Openserve clients.

This is also an important step in reaching our SA Connect national broadband goals.

# Current Access Speeds

Up to 2 Mbps

Up to 4 Mbps

Up to 10 Mbps

Up to 20 Mbps

Up to 40 Mbps

# New Access Speeds

Up to 1 Mbps

Up to 2 Mbps

Up to 4 Mbps

Up to 8 Mbps

Up to 10 Mbps

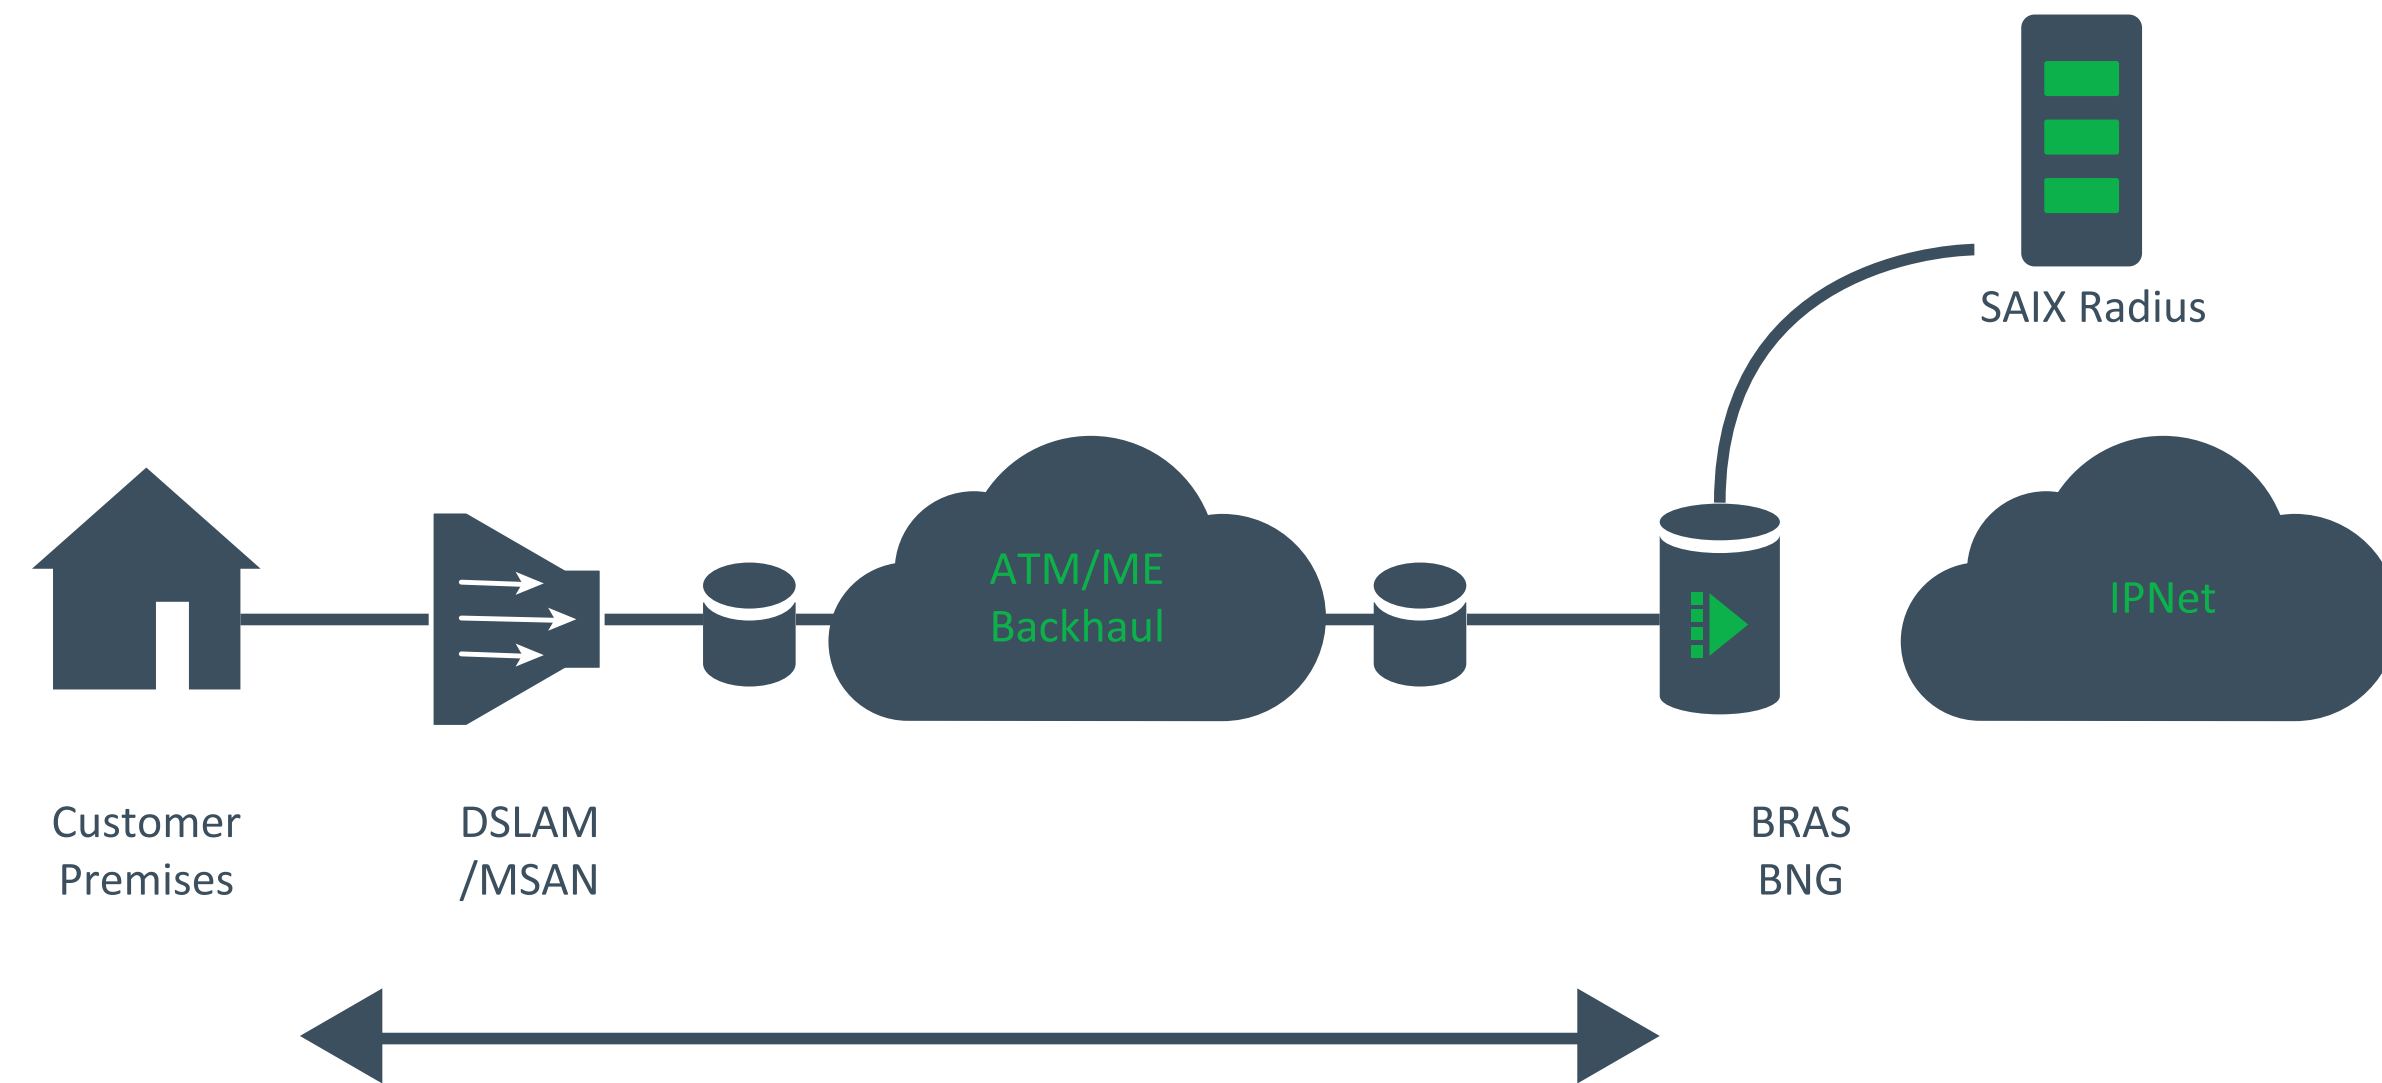

Up to 20 Mbps

Up to 40 Mbps

# Technical Diagram

# What you need to know about Resell DSL

- Resell DSL is a pure wholesale service.
- Rebrand and on-sell it to your customers.
- Add “over-the-top” services & other value adds such as uncapped usage to differentiate your broadband internet offering.
- Availability: all DSL-enabled exchanges.
- Requires a telephone line service at the end-user premises.
- This service means you only need to install, setup and configure a modem for your customer.
- Resell DSL is a best-effort service with no SLAs.
